

Cart Placement Guide

Here are a few tips for properly placing your cart to ensure it is emptied completely and the lid is closed after service.

PARK IT:

- Carts should be in place the night before your collection day.
- Carts should be placed within 3 feet of the street.

POINT IT:

- Carts should face forward.
- Wheels and handles should be placed away from the street.

SPACE IT:

- Cart should have a minimum of 2 feet of clearance on both sides. Please do not place any closer than 2 feet to poles, mailboxes or recycling containers.
- Cart should be unobstructed (no vehicles parked in front of the cart).
